

## MERCHANT TAYLORS' SCHOOL

#### 11+ OFFICIAL PRACTICE PAPER

## **MATHEMATICS**

Time Allowed: 60 minutes

#### **Instructions**:

Answer as many questions as possible. Some of them are easy at the start and become more difficult. You should show all your working on this question paper.

| 1. W          | rite down what the 4 stands for in 3427                               |                             |               |
|---------------|---|-----------------------------|---------------|
|               |   | Answer                      | [1 mark]      |
| <b>2.</b> (a) | What is the eighth even number?                                       |                             |               |
|               |   |                             |               |
| (b)           | What is the fifth prime number?                                       | Answer                      | [1 mark]      |
|               |   |                             |               |
|               |   | Answer                      | [1 mark]      |
|               |   |                             |               |
|               |   | Answer                      | [1 mark]      |
|               | A child's heart beats 80 times per minute. and 15:30 on the same day. | How many times will it beat | between 05:30 |
|               |   |                             |               |
|               |   |                             |               |
|               |   |                             |               |
|               |   | Answer                      | [1 mark]      |

**5.** I think of a number and multiply it by 3 and then subtract 6. If the result is 15 what number was I thinking of?

Answer.....[1 mark]

- **6.** Write down the next two terms in each of the sequences below
  - (a) 10, 13, 16, 19, 22, ......, .......
  - (b) 60, 59, 57, 54, 50, ......, ......
  - (c) 1, 2, 6, 24, 120, ......, ......

[3 marks]

**7.** Fill in the missing operations in the boxes

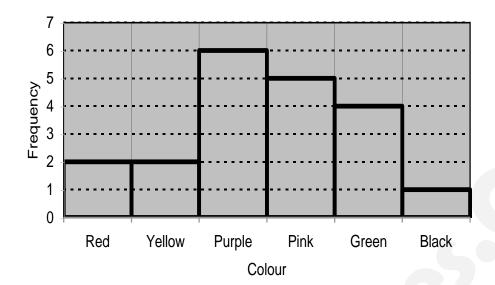

(b) 
$$7 \rightarrow \div 3 \rightarrow 5$$

(c) Give both solutions:

Answer.......and...........[4 marks]

**8.** Each pupil in a class were asked their favourite colour. The bar graph shows these results.

(a) What was the most common favourite colour?

| Answer/ | [1 mark] |
|---------|----------|
|---------|----------|

(b) How many pupils were in the class?

**9.** The following table shows the runs that Michael scored in each of the 11 cricket matches he played for the school team.

| Runs | 0 | 25 | 15 | 40 | 52 | 15 | 6 | 8 | 25 | 35 | 10 |
|------|---|----|----|----|----|----|---|---|----|----|----|

(a) What was the mean number of runs he scored per innings?

Answer.....runs per match [2 marks]

(b) What was the median number of runs scored?

Answer.....runs [2 marks]

| 10. | If you (i)  | roll an ordinary six sided die what is the probability of obtaining   |
|-----|-------------|---|
|     |             | A six   |
|     |             | Answer[1 mark]  |
|     | (b)         | An even number  |
|     |             | Answer[1 mark]  |
|     | (ii)<br>(a) | If I roll the die 60 times how many times would you expect to get a 2 or 3?   |
|     | <i>a</i> .  | Answer[1 mark]  |
|     | (b)         | If I roll a red die and a blue die together in how many different ways can I get a total of 7?                                    |
|     |             | Answer[1 mark]  |
| 11. | sells.      | a works for a computer firm. She is paid £10000, plus £100 for each computer she How much will she earn if she sells 15 computers |
|     |             |   |
|     |             | Answer £[1 mark]  |
|     | (b)         | How many computers does she sell if she earns £12,600 ?   |
|     |             |   |
|     |             |   |
|     |             | Answercomputers [1 mark]  |

#### **12.** Find:

(a) 20% of £840

(b)  $12\frac{1}{2}\%$  of 6.80 metres, giving your answer in *centimetres*.

Answer..... **cm** [1 mark]

**13.** 

Find the size of the angle, in degrees, turned by the *minute* hand of a clock as it moves from the

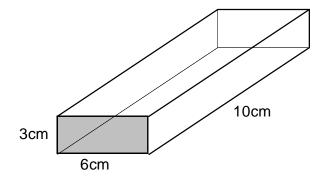

(a) 12 to the 1

Answer.....[1 mark]

(b) 3 to the 7

Answer.....[1 mark]

**14.** 

The above diagram shows a solid box.

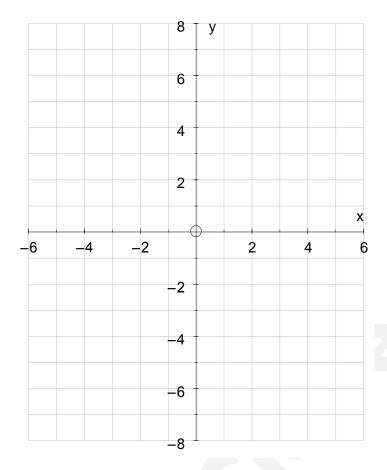

(a) What is the area of the shaded face?

|           |      | 2               |           |
|-----------|------|-----------------|-----------|
| Answer.   |      | cm <sup>2</sup> | [] mark   |
| THIS WCI. | <br> | СП              | [ I mark] |

(b) What is the total surface area of the box?

**15.** Find 
$$\frac{1}{3}$$
 of  $2\frac{1}{4}$ 

16.

| (a) | On the graph | plot the follow | ing points | (-2,4), | (1,7) | and ( | (4, 4) |
|-----|--------------|-----------------|------------|---------|-------|-------|--------|
|-----|--------------|-----------------|------------|---------|-------|-------|--------|

[2 marks]

(b) Plot one further point so that the shape made by joining up the four points has 4 lines of symmetry and rotational symmetry order 4. Write down the co-ordinates of the point you have plotted.

| Answer | [1 | mark] |
|--------|----|-------|
|--------|----|-------|

17. There are 27 students in Mrs Din's class.

Mrs Din buys 4 boxes of chocolates.

There are 36 chocolates in each box.

She shares out the chocolates equally amongst her 27 students.

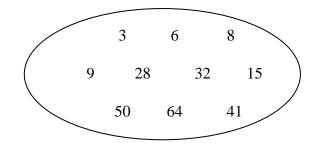

(a) Work out the number of chocolates each student receives.

| Allswei | Answer/ | 1 | mark |
|---------|---------|---|------|
|---------|---------|---|------|

(b) Work out the number of chocolates left over.

| Answer | [1 | mark] |  |
|--------|----|-------|--|
|--------|----|-------|--|

**18.** 

From the numbers in the ring write down all the

(a) square numbers

| Answer     | ./1   | markl     |

|   |                    |  |  |  |  |  |
| m width   | cm [2 mark:        |  |  |  |  |  |

22. Starting with the number 6 the operation 3 is applied followed by the

Operation 1 to give a final answer of 1, as in this example below:

$$6 \bigcirc 3 \triangle 1 = 1$$

Using the same operation for the diamond and triangle, find the missing numbers.

(a) 15 
$$\bigcirc$$
 3  $\triangle$  1 = ?

Answer.....[1 mark]

(b) ? 
$$\bigcirc$$
 3  $\bigcirc$  1 = 8

Answer.....[1 mark]

23. John came home from his vacation at his grandmother's with 5 books. While he was away he bought 2 books at the bookshop and got 1 book as a present from his grandmother. During his stay at his grandmother's, he also gave his cousin 4 books that he had finished. How many books did he take with him when he left for his holiday?

Answer.....books [2 marks]

**24.** Here is a train timetable.

| Place         | Time of departure |
|---------------|-------------------|
| Crewe         | 08:00             |
| Wolverhampton | 08:40             |
| Birmingham    | 09:00             |
| Coventry      | 09:30             |
| Rugby         | 09:40             |
| Milton Keynes | 10:10             |
| London        | 10:45             |

| (a) | How many minutes should it take the train to travel from Wolverham | pton to |
|-----|--|---------|
|     | Milton Keynes?   |         |
|     |  |         |

| Answerminutes [1 mark] |
|------------------------|
|------------------------|

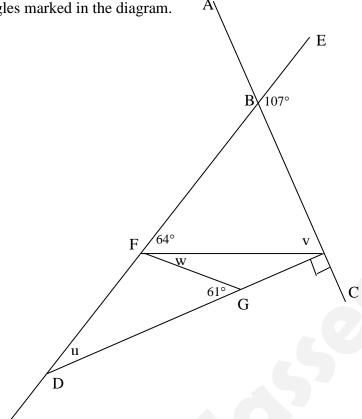

(b) If the train is 35 minutes late leaving Crewe, what time should it arrive in London?

| Answer |  | [1 | mark |
|--------|--|----|------|
|--------|--|----|------|

**25.** List all the positive integers less than 20 that have TWO different factors, other than 1 and itself.

| 26. | Mark has a market stall.  He sells apples at 56p for each kilogram.  Bianca buys 4 kilograms of apples.  She pays for her apples with a £5 note. |                     |
|-----|--|---------------------|
|     | (a) How much change should she get?  |                     |
|     |  |                     |
|     |  | Answer £[1 mark]    |
|     | Mark bought 25 melons for his stall. He paid £16 for 25 melons.  |                     |
|     | (b) Work out the price Mark paid for each n  | nelon, in pence.    |
|     |  |                     |
|     |  |                     |
|     |  | Answer p [1 mark]   |
|     | Five of the melons were bad.  Mark sold the other 20 for 120p each.  |                     |
|     | (c) Work out the total amount for which Ma   | rk sold the melons. |
|     |  |                     |
|     |  |                     |
|     |  | Answer £[1 mark]    |
|     | (d) Work out what profit Mark made in selling fraction of the cost of buying the melons  |                     |
|     |  |                     |
|     |  |                     |
|     |  |                     |
|     |  | Answer 12 marks     |

**27.** Find the angles marked in the diagram.

$$w = \dots ^{\circ}$$
 [1 mark]

- **28.** At noon the temperature is 3 degrees Celsius and it rises at a steady 1.5 degrees per hour throughout the afternoon.
  - (a) What will the temperature be at 1500 hrs

From 1800 hrs the temperature begins to fall at a steady rate so that by midnight it is -3 degrees and continues to fall at this same rate through the rest of the night.

(b) What will the temperature be by 0400hrs?

Answer.....°C [2 marks]
